ReVision Energy Electrical Apprenticeship Career Pathway

Getting Started

Start with a high school diploma, a GED, or a college degree, and some experience with tools or trades work.

On-the-Job

Learning

As a licensed apprentice, get paid to fight the climate crisis while learning from world class renewable energy electricians.

Technical Instruction

Complete 4 years of in-house electrical training courses that align with your day-to-day work.

Professional Advancement

Take advantage of opportunities to advance into leadership positions within our installation crews as you build experience and expertise.

Journeyperson Licensing

At the end of your apprenticeship, receive your electricians license by passing a state's journeyperson exam.

Change the Future

Help mentor the next generation of renewable energy electricians as a supervising journeyperson.
