

Encourage Your Employer to Invest in EV Charging for Your Workplace

Make use of our easy email template!

The transportation sector pumps out more carbon emissions than any other sector in New England. By getting more EV chargers installed at workplaces and businesses, we can make a major step toward reducing these emissions.

As a member of our ReVision community, we want to empower you to help expand the clean energy movement. You can make a significant impact by encouraging your employer or favorite organizations to install electric vehicle (EV) chargers.

In addition to being good for the environment, EV chargers bring a range of other benefits to the table:

1 COST SAVINGS

In many cities/towns there are time-sensitive incentives which will cover much of the upfront costs to install EV chargers.

2 SUSTAINABILITY

EV charging stations are a visible commitment to the future of the planet, positioning your company as a leader in workplace sustainability.

3 HIGHER SATISFACTION

Offering EV charging increases both employee and customer satisfaction, making your business stand out as a progressive and responsible entity.

We've made it easy for you. Below is a sample email you can send to your employer or an organization you think would be a great fit for offering EV chargers.

By spreading the word, you're helping build a cleaner, more sustainable future for all of us. Thank you for your continued support and commitment to clean energy!

Send this email to your boss!

Simply copy/paste the following template into a new email and customize however you'd like.

Subject: Have You Considered Installing EV Chargers?

Dear [Manager or Company Name],

I have an idea that can benefit our organization and community: installing electric vehicle chargers.

By installing EV chargers, you can:

- Take advantage of current incentives that cover much of the upfront installation cost.
- Set our business apart with a strong commitment to sustainability.
- Increase employee satisfaction by offering a modern and convenient perk.
- Attract more customers who value environmentally conscious businesses.

I've partnered with ReVision Energy before and trust them as a leader in the EV area – they'll do a custom quote for our business: [Commercial EV Charging | ReVision Energy](#)

I believe this would be a fantastic step forward for our organization and our community. Thank you for considering this opportunity!

Best,

[Your Name]
