

Solar for Property Developers

Lock In Your Building's Electrical Expenses for the Next 25 Years

Utility prices are volatile, but your building's operating costs can stay low. By partnering with ReVision Energy, you can lock in a stable electricity rate for the next 25 years and protect your bottom line.

ReVision Energy's design team consistently delivers solutions that maximize energy generation while maintaining efficiency and competitive pricing. Their construction team produces high-quality work and reliably delivers projects on schedule. During the close-out phase, documentation is completed promptly, ensuring projects become fully operational without delay. Throughout the design, construction, and close-out phases, ReVision Energy demonstrates a high level of professionalism and responsiveness.

Why Install Solar with ReVision Energy?

1

EARLY COORDINATION

Our Commercial Sales Consultants join your project early and coordinate with architects, electrical engineers, and owners to site solar correctly and avoid scope conflict.

2

TECHNICAL DESIGN & INTERCONNECTION

We produce layouts, structural and electrical inputs, and interconnection packages for the utility—ensuring the array is efficiently integrated into your building plans.

3 FINANCING & INCENTIVES

We help model project economics, lock down financing options, and capture available incentives (ITC adders, depreciation), aligning solar with your budget and schedule.

4 PERMITTING & PROCUREMENT

Our operations team manages permits and requirements to keep the project on schedule.

5 CONSTRUCTION & COMMISSIONING

Our field crews build to spec, coordinate with other contractors, and deliver high-quality installation and commissioning—on time for key financing milestones.

6 CLOSE-OUT & O&M

We finalize documentation, provide training, and set up monitoring and service so your system operates reliably for decades with a single point of contact.

Our hands-on approach means we're involved throughout the project lifecycle, and you always have someone to contact with questions or ideas.

Meet David Webb!

ReVision Energy Commercial Sales Lead

Over the past eight years, David has partnered with businesses across the Granite State, from small enterprises to large new construction projects, to implement renewable energy solutions. As an employee-owner, David has successfully worked on hundreds of commercial solar projects, including 30+ installations in the affordable housing sector, helping communities reduce costs and carbon emissions.

ReVision has been an outstanding partner in bringing solar to our multifamily development projects. Their knowledge and expertise have been extremely important in helping us as owners to navigate the changing regulatory landscape and ensuring that we have been able to install our solar arrays efficiently and on time for key financing deadlines. ReVision's staff is friendly, approachable, responsive, and easy to work with! Because they are so experienced, we don't have to worry about micromanaging the process and can be confident that ReVision will get the job done.

Developing Affordable Housing? We Do That Too.

We also have decades of experience navigating solar for affordable housing projects, using both the Low Income Housing Tax Credit (LIHTC) and clean energy Investment Tax Credits (ITC) in creative, additive ways to finance their array.

ReVision Energy has also worked with Avesta Housing to install solar on 35 different projects across Maine and New Hampshire.

Keene Housing has partnered with ReVision Energy to install solar on over 55 roofs in New Hampshire's Monadnock region, saving the affordable housing developer over \$100,000 in annual electric costs.
